1 Novelty

D1, which is considered the closest prior art, shows a pyrazolecarboxylic acid derivative with an affinity for CB1 cannabinoid receptors.

The subject matter of the application differs from this compound in that the pyrazole group is replaced by a phenyl group.

The subject matter of claims 1-10 is therefore novel (PCT Article 33(2)).

- 2 Inventive step
 - This replacement is considered non-obvious to a person skilled in the art. The subject matter of claims 1-10 therefore involves an inventive step (PCT Article 33(3)).
- Industrial applicability

 The compounds of the application can be used as psychotropic drugs.
